

AMENDMENTS TO THE SPECIFICATION

Please amend the specification as indicated hereafter. It is believed that the following amendments and additions add no new matter to the present application.

In the Title:

Please replace the title with the following new title:

**SYSTEM AND METHOD FOR A SIMPLIFIED DIGITAL
CAMERA INTERFACE FOR VIEWING IMAGES AND
CONTROLLING CAMERA OPERATION**

In the Specification: [Use ~~strikethrough~~ for deleted matter (or double square brackets "[[]]" if the strikethrough is not easily perceivable, i.e., "4" or a punctuation mark) and underlined for added matter.]

Please amend the paragraph starting on p. 10, line 1 as follows:

When the digital image data corresponding to displayed image 308 is deleted, one embodiment of digital camera 100 displays the previously captured image. In another embodiment, after the image data is deleted, digital camera 100 displays the next most recently captured image. In yet another embodiment, digital camera 100 displays the live preview of the current image detected by photosensor 206 (FIG. 2). If, after deletion of the image data, no other images remain in memory, digital camera 100 defaults to displaying the live preview of the current image. If control button 106 is depressed when the live preview of the current image is displayed, one embodiment of the digital camera turns off the display 124.
